

... about the bike deposit!

The news that the Janna 'e Sole Hotel has organized a controlled bike storage, caused many phone calls and emails of worried cyclists!

The hotel wants to avoid any possible damage to the rooms that have just been refurbished (*lacquered furniture, white blankets, etc.*) and has organized everything because the bike storage is safe and functional:

SAFETY - it was the first concern of the hotel which is well aware of the responsibility that is assumed in keeping 500 valuable bikes in a single place:

- a) the room will ALWAYS be guarded, day and night, by two security men
- b) the lights will always be on
- c) a camera system has been specially fitted to control it 24 hours a day!

FUNCTIONALITY - it will be ... if the cyclists "collaborate" in positive and will have a "civil" behavior:

- a) access to the deposit is always free at any time
- b) all bikes will have their own fixed position according to the race number: each rider will immediately know where to go to deposit it and to collect it
- c) there is the mechanical assistance in one side and the bike washing in the other side ...
- d) ... the cyclist will be able to "pamper" the bike in the garden and on the patio (existing in almost every room): only he **can't** carry it "inside" the room and must keep it in the storage¹

What's better?

After this time maybe you will find out that it was the right thing and we will ask for the service in the future!
